CuZn21Si3P | Lead-free special brass

Material designation						
EN	CW724R CuZn21Si3P					
UNS	C69300					

Chemical compos	sition ¹
Cu	76 %
Si	3,3 %
Ρ	0,05 %
Zn	Rest
Pb	max. 0,0500 %

Material properties and typical applications

eco SW5 is a lead-free special brass resisting high load and exhibiting good corrosion resistance as well as excellent machinability. This alloy is suited to the production of machined and drop forged parts. eco SW5 is available as machining rod and in hot stamping quality and is designed for applications where high strength is needed. With its lead content not exceeding 500 ppm, it meets the requirements of Entry 63 in Annex XVII of the Reach Regulation. eco SW5 is used, among other things, for jewellery and watch parts and for the production of other consumer products.

The material is lead-free according to RoHS and ELV.

¹Reference values in % by weight

Physical properties ²		
Electrical conductivity	MS/m %IACS	
Thermal conductivity	W/(m·K)	35
Density	g/cm³	8,25
Moduls of elasticity	GPa	~ 100

²Reference values at room temperature

Corrosion resistance³

Special brass generally exhibits good corrosion resistance due to alloying additions. The addition of silicon increases the tarnish resistance and the sensitivity to stress corrosion cracking and dezincification is reduced. ³*Reference values*

Types of delivery

The BU Extruded Products supplies bars, wire, sections and tubes. Please get in touch with your contact person regarding the available delivery forms, dimensions and tempers.

Fabrication properties									
Forming		Surface treatment ⁴							
Machinability (CuZn39Pb3 = 100 %)	90 %	Polishing							
Capacity for being cold worked	good	mechanical electrolytic	good poor						
		Electroplating	good						
Capacity for being hot worked	excellent	⁴ for further fabrication properties, please call your contact person.							
Joining		Heat treatment							
Resistance welding (butt weld)	good	Melting range	860 – 925 °C						
Inert gas shielded arc welding	good	Hot working	680 – 750 °C						
Gas welding	good		550 – 580 °C 1 – 3 h						
Hard soldering	good	Soft annealing							
Soft soldering	good
