

Wieland has elected to invest in a Transportation Management Platform, **Transporeon**, to manage load tendering for North American freight.

Carrier Web Client: Web based platform for suppliers to easily create deliveries for Wieland to dispatch into transports for carriers.

Real Time Communication All changes to the transport order are automatically and immediately available to all parties involved.

Current Delivery Status The current delivery status can be checked at any time via real-time communication.

Registration Instructions for Transporeon (if not currently registered):

Please go to <https://register.transporeon.com/L4K2BK> to register your company on the Transporeon platform. Once the Transporeon team has connected your company to Wieland, you will receive an email that includes training materials.

=====

1) Shipment Weight 0-100# Route via UPS Ground

When shipping small package and letter, the preference is to ship prepaid and add the actual charges as a separate line item to the invoice.

If the order must go collect or 3rd party bill to Wieland North America, UPS is the preferred small package and letter courier provider for freight collect and 3rd party billing. You **MUST** make sure UPS references the Purchase Order on all UPS shipments. At a minimum, the contact name you are shipping to should be referenced.

If you are routing next day prior to noon delivery, you must obtain written approval from Wieland North America. Provide the shipper with your department's UPS Account Code.

2) For Standard LTL Delivery (100# - 20,000#) use Transporeon Supplier Connection Portal:

Use Transporeon to route your Wieland North America shipment when:

- ✓ It weighs more than 100 pounds
- ✓ It weighs less than 20,000 pounds
- ✓ It is palletized/ skidded
- ✓ It has a size above 130 inches

This is determined by applying the following calculation: (length + girth, where girth is 2x width plus 2x height).

NOTE: Make sure your shipment by size or pallet count does not utilize the cubic capacity of the trailer. To verify cubic capacity applications, contact the local LTL carrier terminal.

Wieland North America Routing Guide

Transporeon will assign the carrier based on rate/service priorities assigned by Wieland North America.

A visual of our LTL route guide is below. Transporeon will only allow you to tender rate to approved carriers with contracted rates in your lane. Should you get an error for no rate, contact Wieland North America Corporate Logistics for instructions.

Max Skid Weight LTL = 5,000#. If a skid is 5,000# or more, contact corporate logistics (see item 4 below).

XPO Logistics	All States
Estes Express Lines	All States

IMPORTANT: Once the shipment is posted in the portal, you will receive the BOL from a Wieland Logistics employee. Please sign section 7, sign as the shipper on the bottom and provide this bill of lading to the carrier at time of pickup.

For special handling shipments, contact Wieland North America Corporate Logistics:

Ship To Location	Contact	Email
East Alton, IL	Shelly Cloninger	Shelly.Cloninger@wieland.com
East Alton, IL	Dwyane Kemp	dwayne.kemp@wieland.com
Wheeling, IL	Ken Gauger	kenneth.gauger@wieland.com
Wheeling, IL	Leo Galvin	Leonel.Galvan@wieland.com
Waterbury, CT	Mario Parrotta	Mario.Parrotta@wieland.com
Waterbury, CT	Rj Griffin	rj.griffin@wieland.com
Cuba, MO	Donna Jenkins	donna.jenkins@wieland.com
Wheeling, IL	Ed Mayes	William.Mayes@wieland.com

***** Pine Hall Location *****
