

CARO®BULL

Quick and easy plunger tip concept

Adaptable on almost any plunger rod
Quick change directly at DCM
High flexibility through modular design

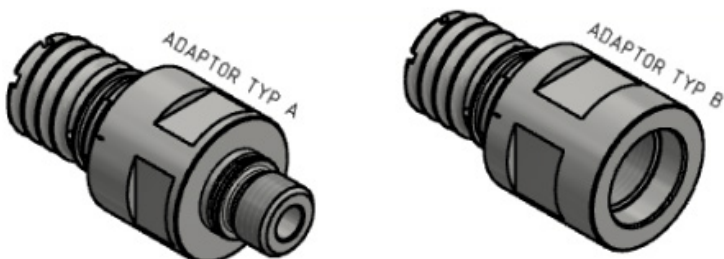

Advantages of CARO®BULL

The bull series has been designed as a quick-change system. Mounting of different diameters with same body sizes enables cost-effective and flexible production. Pressure rings and slide bushings can be turned and reused.

- Change of plunger tip requires only a few steps
- Mountable on existing rod through Adaptor
- Low-wear plunger tip concept
- Quick change at DCM leads to fewer downtimes
- Flexibility via modular design
- Free of beryllium and cobalt

Adapters tailored according to existing connecting thread
