<td>CW 103C</td>
</tr>
</tbody>
</table>

### Material

Precipitation hardened copper alloy with very high hardness and good electrical and thermal conductivity.

### Applications

- Electrodes for spot welding, especially for stainless steel
- Electrodes for projection welding
- Butt welding jaws
- Contact tips for submerged-arc-welding
- Plunger tips for horizontal die casting machines
- Moulds for NF-metal castings

### Mechanical Properties

#### Conditions

### Physical Properties

#### Electrical conductivity

- 20 °C (293 K)
  - MS/m
  - % IACS
  - min. 25
  - min. 40

#### Electrical resistance

- 20 °C (293 K)
  - Ω•mm²/m
  - 0.033–0.05

#### Coefficient of electrical resistance

- 0-100°C (273-373 K)
  - 1/K
  - 0.0019

#### Coefficient of thermal expansion

- 0-320°C (273-593 K)
  - 1/K
  - 170•10⁻⁶

#### Specific heat

- J/g•K
  - 0.42

#### Thermal conductivity

- 20 °C (293 K)
  - W/m•K
  - c. 210
- 200 °C (473 K)
  - c. 280
- 300 °C (573 K)
  - c. 320

#### Density

- g/cm³
  - 8.8

### Products

Rods drawn or extruded in round, square and flat; discs and rings, forgings, electrodes for spot-, seam-, projection- and butt welding, castings on request (Available sizes can be found in our current stock list).

Standards / Tolerances

| DIN EN 12 163 | Round bars for general purpose. |
| DIN EN 12 167 | Profiles and rectangular bars for general purpose. |

Health note

The material contains small amounts of beryllium, cobalt and nickel. Inhalation of fine dust and steam is to be avoided. During machining, the H-phrases (H301; H302; H332; H350; H334; H372) and the P-phrases (P201; P202; P260; P308; P313) must be observed.

All statements as to the properties or utilization of the materials and products mentioned in this datasheet are only for the purpose of description. Guarantees in respect of the existence of certain properties or utilization at the material mentioned are only valid if agreed upon in writing.
