CuZn35Pb2 | Machining brass

Material designation

EN	CuZn35Pb2 CW601N
UNS	C34200/C34500

Material properties and typical applications

Wieland-Z12 is a high-copper machining brass which has excellent cold working properties and can still be machined. It is ideal for producing components which are primarily coined, riveted, crimped or flanged and, to a small extent, machined.

Capacity for being cold worked	good
Capacity for being hot worked	good

Surface treatment

Polishing	
mechanical electrolytic	good fair
Electroplating	excellent

Joining

Resistance welding (butt weld)	fair
Inert gas shielded arc welding	poor
Gas welding	poor

Corrosion resistance

Machining brass is generally quite resistant against organic substances as well as neutral or alkaline compounds.
Stress corrosion cracking should be taken into account, especially in an ammoniacal atmosphere and whilst under mechanical stress. Dezincification in warm, acidic waters should also be taken into consideration.
