## CuZn35Pb2 | Machining brass

#### Material designation

| EN  | CuZn35Pb2       |
|-----|-----------------|
|     | CW601N          |
| UNS | C.34200/C.34500 |

### Chemical composition\*

| Cu | 63 %    |
|----|---------|
| Pb | 2 %     |
| Zn | balance |
|    |         |

<sup>\*</sup>Reference values in % by weight

#### Material properties and typical applications

Wieland-Z12 is a high-copper machining brass which has excellent cold working properties and can still be machined. It is ideal for producing components which are primarily coined, riveted, crimped or flanged and, to a small extent, machined.

#### Physical properties\*

| Electrical           | MS/m                | 14.7 |
|----------------------|---------------------|------|
| conductivity         | %IACS               | 25   |
| Thermal conductivity | $W/(m\!\cdot\! K)$  | 116  |
| Thermal expansion    |                     |      |
| coefficient          |                     |      |
| (0-300 °C)           | 10 <sup>-6</sup> /K | 20.4 |
| Density              | g/cm³               | 8.46 |
| Moduls of elasticity | GPa                 | 105  |

<sup>\*</sup>Reference values at room temperature

#### Types of delivery

**Fabrication properties** 

**Forming** 

The BU Extruded Products supplies bars, wire, sections and tubes. Please get in touch with your contact person regarding the available delivery forms, dimensions and tempers.

#### ty ara 100

| Machinability                  | 80 % |
|--------------------------------|------|
| (CuZn39Pb3 = 100 %)            |      |
| Capacity for being cold worked | good |
| Capacity for being hot worked  | good |

## Surface treatment Polishing

mechanical good electrolytic fair

Electroplating excellent

#### Corrosion resistance

Machining brass is generally quite resistant against organic substances as well as neutral or alkaline compounds.

Stress corrosion cracking should be taken into account, especially in an ammoniacal atmosphere and whilst under mechanical stress. Dezincification in warm, acidic waters should also be taken into consideration.

| Joining                        |           |
|--------------------------------|-----------|
| Resistance welding (butt weld) | fair      |
| Inert gas shielded arc welding | poor      |
| Gas welding                    | poor      |
| Hard soldering                 | fair      |
| Soft soldering                 | excellent |

| Heat treatment           |                     |
|--------------------------|---------------------|
| Melting range            | 885–910 °C          |
| Hot working              | 700-800 °C          |
| Soft annealing           | 450-650 °C<br>1-3 h |
| Thermal stress relieving | 200-300 °C<br>1-3 h |

#### Product standards

| Rod        | EN 12164 |
|------------|----------|
