

Copper rotor bars

Your benefits

- Ready to install
- Consistently high quality
- Fully automated processes for maximum cost efficiency
- Quality assurance beginning with the casting process
- One partner from small sample quantities up to large volume capacity
- Engineering Service / R&D

Technical features

- Deburred and machined ends
- Various shapes and cross-sections
- Dimensional accuracy
- Twisted or straight bars
- No porosity, no bubbles
- Increased mechanical strength through cold working process
- Optimum electrical conductivity

Fully automated production line
